## **Kinos08 video- and short film festival in Lahti from 28.3. to 30.3.2008**

The Kinos08 video- and short film festival will take place in Lahti, Finland from 28.3. To 30.3.2008. As in the previous four festivals the program consists of home videos taking turns with more professional productions. As a new element, theme series will be started. This year it will be ecological films.

### ***Kinos wants you!***

We now invite you to participate in the festival programme with your own piece of work. We take fiction, documentary, animation, music videos, experimental films, video art or whatever, regardless of the topic. Even the snottiest films are welcome, since the mission of the festival is to present especially the works left outside of the mainstream movie festivals. The concept and the idea matter, not the size or quality of the production.

In kinos08 the special theme is ecological film. To this series we welcome films that observe the environment and ecological issues from fresh and interesting perspective.

The proposed work is to arrive by 29 february 2008 at the latest. The recommended formats of the work are dv, dvd, 16mm or 35mm film. We will also try to present other formats, if necessary.

Please, send your work and clearly filled application form to the address:

Elokuvateatteri Kino Iiris  
Saimaankatu 12  
15140 Lahti  
Finland

NB. We will not present a work arriving after the due date!
